Notes:

Well caps drilled to allow equalization with atmospheric pressure, 20 April 2010

DTW = Depth to water from top of casing.

Temp = Temperature, degrees centigrade.

PROJECT: McKenzie Conservation Area
Newman Lake
Spokane County, WA

SUBJECT: Monitor Well Installation

Dear Vince,

We visited the site on June 3, 2010 at your request to drill and sample two 30' test borings approximately as located on your site map. This work supplements previous drilling, sampling, and monitoring well installation described in our report dated April 21, 2010. The borings were drilled and sampled using hollow stem light auger (3¼ inch ID). They were advanced with our drilling mast attached to a tracked excavator to access the sites. The borings were sealed with bentonite in accordance with Washington State Department of Ecology Regulations.

Test Boring #1 is located in the northwest area of the site; Test Boring #2 is to the southwest. Coordinates from a recreation grade GPS are presented on the attached logs.

Soils across the site generally consisted of 2 to 3 feet of organic peat overlying silty sand or sandy silt with clay varying in color from light brown to dark brown. A uniform deposit of clay was encountered at 24 feet and 28.5 feet in Test Boring #1 and #2 respectively. More detailed descriptions are on the attached *Resource Protection Well Reports*.

Please contact us if you have questions or concerns regarding the information presented herein.

Respectfully Submitted:
BUDINGER & ASSOCIATES, INC.

RE: Wetland Delineation Report for a 106-acre portion of the McKenzie Conservation Area (NW Newman Lake, Spokane County).

To whom it may concern:

On Wednesday, April 21st, 2010, Vince and I walked the 106-Acre subject property. We observed that a large portion of the subject property (i.e. greater than 90%) meets the definition of a sloped wetland. I have reviewed Mr. Barthels field work and report and concur with his delineation and wetland rating conclusions.

It is my understanding that this subject property is being considered for future wetland enhancement measures. This is an excellent opportunity to enhance and protect a unique wetland system, which is a notable public benefit. As mentioned in the wetland report, the wetlands on the property provide a number of functions and values. Ecology enthusiastically supports anticipated enhancement measures and looks forward to working with Spokane County and reviewing future designs for the wetlands contained on the property.

I appreciate the opportunity to comment on this wetland delineation report. If I can be of further assistance please give me a call at (509) 329-3426.

Sincerely,

Jeremy Sikes
